

If you are currently enrolled at one of HSE's partner universities and your program requirements allow, you can spend four to six months at the Faculty of Mathematics at HSE as part of your studies. Exchange students can take Russian- and English-taught courses.

Lists of English-language courses available in 2016-2017 can be found at:

<http://www.hse.ru/en/ma/math/courseanns>

<http://www.mccme.ru/mathinmoscow>

List of Russian-taught courses:

https://math.hse.ru/announcement_2016

How it works

Please apply through the international relations or study abroad office at your home university. The exchange coordinator at your home university will then email your nomination to international.study@hse.ru and include the following information: your name, email address, sex, field of study, study level (Bachelors, Masters, or PhD), and desired semester(s) at HSE.

After HSE confirms your nomination with your home university, HSE will send you a welcome e-mail with instructions regarding the process and a link to your online profile. You will have to fill in the online profile and attach copies of the mandatory documents before the deadline.

The International Students Office will then apply for an official invitation for your visa, issue an acceptance letter, walk you through how to apply for a visa, and answer any pre-departure questions that you may have.

Please check the International Students Office website (<http://istudents.hse.ru/>) for more information.

Deadlines

Nominations for Spring Semester: September 15, 2016

Online profile completion for Spring Semester: October 15, 2016

Tuition fees

Normally successful applicants are awarded a full tuition fee reduction

2016 - 2017
